

BRAND BOOK · VERSION 1.0

**Show the bias.
Do not hide it.**

VOID NEWS

One parent brand, Void, with four product editions that share a single mark: News, History, Weekly, Vision. The Sigil is not decoration. It is a diagram of what the product does. Every rule in this book protects that promise.

1. What the Sigil means

Coverage ring — the breadth of sources. A hollow lens, the analytical "void" you look through. The O in VOID.

Level balance beam with | - | end ticks — the multi-axis bias reading. Level means balanced. In motion it sweeps the lean spectrum.

Foot (post and base) — the instrument's stand, the method. Measurement moves; the method does not. It never tilts.

The logo performs the methodology

When the beam sweeps in the animated mark it crosses blue, green, red, the same spectrum the product paints across every story.

Never fill the ring (it is a lens), tilt the foot, or freeze the beam in a bias colour. A fixed blue or red Sigil implies the brand itself leans. The sweep is motion only.

3. Clear space & minimum sizes

Minimum clear space on all sides equals the height of the Sigil ring (its diameter). Nothing — type, image edge, another logo — enters that zone.

Never stretch, skew, add a shadow, gradient, or outline; rebuild the wordmark in another typeface; or place the colour mark on a ground that drops it below 3:1 contrast (switch to black or reversed).

Green means centre only. Never use the centre green to signal "good," or the right-hand red for an error state. That corrupts the one place colour carries data. Accent is a spice, not a base: if a screen looks colourful, it is wrong.

5. Typography

Void carries meaning in serif.

Playfair Display (editorial) · Inter (structural) · Barlow Condensed (meta) · IBM Plex Mono (data)

The one-line rule: serif carries meaning, mono carries measurements, and the two never trade jobs.

6. Voice

Show, don't tell

Bad: "Tensions are rising significantly between the two nations."

Good: "Both countries recalled their ambassadors within 48 hours. Neither has done that since 1979."

Arrive late, leave early

Bad: "The Partition of India was a complex process that began with British colonial rule and led to two nations in 1947."

Good: "A lawyer who'd never been to India drew the border in five weeks. 15 million crossed it."

No em dashes

They are an AI tell. Rewrite as two short sentences, or use a comma, colon, or parentheses. The single exception is spoken audio scripts, where an em dash is a breath mark for text-to-speech.
